

PURPLE UMBRELLA — FINALE BANK

NIGHT-BEFORE EDITION National Climate & Heritage Quiz · 6–7 Oct 2026 · Dr. Ambedkar International Center, New Delhi · Theme: **AI & Climate Action**

What this file is: a complete tournament kit — format intel, a 16-photo **visual round**, **connection puzzles**, **fact-or-myth**, an **AI × Climate special round**, **60 rapid-fire** questions, 2026 dates/themes, and crisis scripts so nothing rattles your team.

! SCAVENGED INTEL — WHAT I FOUND (read in 30 seconds)

- **No public past papers exist** for this quiz (I checked their site, their official booklet, archives, news). Their track page says: “*Final team requirements, quiz format, timelines and event flow will be shared through the official participation guidelines.*” → **Tonight, ask your teacher for that guidelines doc/schedule — it beats everything here.**
- **What I did find:** their official festival booklet (team, standards, prizes), their org team, and the exact format patterns of comparable Indian climate/heritage quizzes — used to build the rounds below.
- **Most likely format** (by strong analogy with Indian school quizzes): a **written MCQ elimination** (≈20–30 Qs, ~20 min) → **top 6–8 teams** on stage → **4–6 finale rounds** normally including: visual/image round, connection round, fact-or-myth or MCQ, rapid fire, buzzer, and a themed special round (likely AI × Climate this year).
- **Prize stakes:** Champions ₹50,000 + trophy; Runner-up ₹20,000. 100+ schools, 1,000+ students.

PART 0 · GAME PLAN — 60 SECONDS TO READ

How to play so that even a bad round doesn't embarrass the school.

TEAM ROLES (assign NOW, before you enter)

- **Player 1 — THE NUMBERS** (Part 6: ppm, 45 sites, 891 lions, 3,682 tigers, 500 GW...) — owns every number question.
- **Player 2 — THE MAP** (states, parks, monuments, COP cities, rivers) — owns “where” questions.
- **Player 3 — THE NEWS + AI** (COP31, 2026 themes, Mission Mausam, Mission LiFE) — owns current affairs & the AI round.
- **Captain (you?)** — speaks the final answer only after a 2-second huddle. One voice on stage = zero confusion.

FIVE RULES THAT WIN MARGINAL POINTS

1. **Never leave a written MCQ blank** (unless negative marking is announced) — eliminate 2 options, pick from the rest.
2. **Answer, then decorate.** “Belém.” ... “— in Brazil, the Amazon COP.” The extra detail earns goodwill and tie-break points.
3. **Buzzer discipline:** in buzzer rounds buzz only at 70%+ confidence. Let rivals burn negatives; half the final is lost by reckless buzzing.
4. **Pass late, not early:** save a pass for the category you truly don't know; a pass on an easy question is a self-inflicted wound.
5. **Talk smart when unsure:** name the category you're certain of — “It's one of the Western Ghats sites...” — sometimes the quizmaster nudges, and you never look blank.

PART 1 · VISUAL ROUND — 16 PICTURES THAT ARE “BANKERS”

Image rounds are where unprepared teams die. Learn these 16 cold: identify + one fact each. (Photos for study only.)

Identify this monument. What is the specific pollution damage it suffers, and what is the zone protecting it called?

Taj Mahal, Agra (UNESCO 1983). Acid rain + particulate pollution yellow its marble — called ‘**marble cancer**’; cleaning includes multani-mitti (mud-pack) treatment. Protected by the **Taj Trapezium Zone** (strict emission limits around it).

Identify. Which of Delhi's three UNESCO World Heritage Sites is it, and what famous metallurgical marvel stands in its complex?

Qutub Minar — Delhi's UNESCO site since **1993**, begun by Qutb-ud-din Aibak. The complex has the **Iron Pillar** — 1,600+ years old and almost rust-free (metallurgy marvel).

Identify. Which emperor built it, and which recent climate-linked threat affects it?

Red Fort (Lal Qila), Delhi — built by **Shah Jahan** (1639–48), UNESCO 2007, India’s Independence-Day address venue. Threats: Yamuna floodplain encroachment, monsoon seepage, air pollution.

This wheel belongs to which temple, and what do the temple’s 24 wheels and 7 horses represent?

Konark Sun Temple, Odisha (UNESCO 1984). The 24 wheels = **hours of the day** (they work as sundials); 7 horses = **days of the week**. Coastal salt-laden air and humidity are its climate stressors.

Identify this structure and what it tells us about traditional climate wisdom.

Rani ki Vav, Patan, Gujarat (UNESCO 2014) — a 7-level stepwell. Heritage answer for water security: **traditional rainwater harvesting** — the original climate-resilient architecture.

Identify the iconic structure and its site.

Stone Chariot, Vittala Temple, Hampi, Karnataka (UNESCO 1986) — capital of the **Vijayanagara Empire**, on the Tungabhadra river; the boulder landscape is now at risk from extreme heat and changing rainfall.

Name this ecosystem and the world record it holds.

Sundarbans mangroves — the **world’s largest mangrove forest** (India–Bangladesh). Climate hero: buffers cyclones, stores ‘blue carbon’ (3–5× more per hectare than land forests), and it is **shrinking with sea-level rise**.

Identify the animal and park. What climate disaster does this park face almost every year?

One-horned rhinoceros, Kaziranga National Park, Assam — about two-thirds of the world’s population. It floods almost every monsoon (Brahmaputra) — animals flee to highlands; the park is a case study in flood resilience.

Identify the animal. India’s latest count and the Project that protects it?

Royal Bengal Tiger — India’s **3,682 tigers (2022 census, world’s largest population)**; protected under **Project Tiger (1973)**. Climate angle: Sundarbans tigers face sea-level rise and cyclones.

Identify the animal. Where is its **ONLY** wild home, and the latest census figure?

Asiatic Lion — only wild home is **Gir, Gujarat**. The **16th lion census (May 2025): 891 lions**, up from 674 in 2020 (+32%).

Identify this bird. Why is it a symbol of the renewables-vs-wildlife debate?

Great Indian Bustard (GIB) — Rajasthan's state bird, **critically endangered**; collides with power lines of solar/wind projects in the Thar. Conservation breeding at **Sam (Jaisalmer)**; bird diverters on power lines are the fix.

Identify this animal. What is its national status, and which sanctuary protects its biggest population?

Ganges River Dolphin — India's **National Aquatic Animal** (2009). Practically blind, uses **echolocation**. The **Vikramshila Gangetic Dolphin Sanctuary (Bhagalpur, Bihar)** is its key habitat; river pollution is the main threat.

Identify this remarkable structure — which state, and why is it in a heritage quiz on climate?

Living Root Bridges, Meghalaya (Cherrapunji area) — khasi/jaintia tribes **train rubber-tree roots** to form living bridges that grow stronger for centuries. A UNESCO tentative-list candidate — the ultimate example of **living heritage + climate adaptation** (survives floods that destroy concrete).

Identify this ecosystem. What is the climate phenomenon destroying it?

Great Barrier Reef, Australia — the world's largest coral reef system. Warming water causes **coral bleaching** (corals expel their algae); ocean acidification adds to it. The strongest symbol of why 1.5°C matters.

Identify the two technologies. What milestone did India cross with them in 2025?

Solar + wind energy — in **June 2025 India crossed 50% non-fossil share of installed power capacity**, five years ahead of target; now ~52%. Targets: 500 GW non-fossil by 2030, 60% by 2035.

Identify this peak/park. What unique UNESCO tag does the park hold, and what 2023 disaster struck the state?

Khangchendzonga National Park, Sikkim — India's **ONLY 'Mixed' UNESCO World Heritage Site** (cultural + natural, 2016). In October 2023, the **South Lhonak glacier-lake outburst (GLOF)** caused devastating floods in Sikkim — a climate-warning icon.

PART 2 • CONNECTION ROUND — 8 PUZZLES (find the link)

Indian quizzes love "what connects?" — often worth double points.

C1. Glasgow • Sharm el-Sheikh • Dubai • Belém — what's the link?

→ Host cities of **COP26 (2021, UK)**, **COP27 (2022, Egypt)**, **COP28 (2023, UAE)** and **COP30 (2025, Brazil)**. (COP29 was Baku, Azerbaijan — a trick the earlier list omits.)

C2. Kaziranga • Gir • Hemis • Sundarbans

→ India's iconic protected areas, each on a different **climate frontline**: floods (Kaziranga), heat/drought (Gir), snowmelt & warming Himalaya (Hemis), sea-level rise (Sundarbans).

C3. Mission LiFE • ISA • CDRI • IBCA

→ **India-led global climate initiatives**: Lifestyle for Environment (2022); International Solar Alliance (with France, HQ Gurugram); Coalition for Disaster Resilient Infrastructure; International Big Cat Alliance (2023).

C4. Chilika • Loktak • Sambhar • Keoladeo

→ All **Ramsar wetlands**. Loktak (Manipur) and Keoladeo (Rajasthan) are the two Indian sites on the **Montreux Record** (threatened wetlands). Chilika & Keoladeo were India's first two Ramsar sites (1981).

- C5. Rani ki Vav · Chand Baori · Johads · Zabo**
→ **Traditional Indian water-harvesting heritage** — stepwells (Gujarat/Rajasthan), johads (Rajasthan), zabo (Nagaland). The climate lesson: communities stored water for dry months for centuries.
- C6. Sarnath · Sanchi · Bodh Gaya · Lumbini**
→ Buddhist heritage sites. Trick inside: **Lumbini is in NEPAL**, not India — quizmasters love this. Sarnath (India’s newest UNESCO site, 2026) is where Buddha gave his first sermon.
- C7. Sand tiger?? No — Snow Leopard · Red Panda · Great Indian Bustard · Gangetic Dolphin**
→ Species with **dedicated national conservation programmes** in India: Snow Leopard (SPA, first survey ~718 in 2024), Red Panda (Sikkim/Arunachal), GIB breeding programme, National Dolphin Project — each shows wildlife conservation + heritage pride.
- C8. Shekha Jheel · Patna Bird Sanctuary · Chhari-Dhand · Jai Prakash Narayan (Surha Tal)**
→ India’s **newest Ramsar sites (2026 additions)** — UP and Gujarat.

PART 3 · FACT OR MYTH — 15 STATEMENTS

Speed round: shout FACT / MYTH. Left column = the statement read aloud.

Statement	Truth	Why
“Climate change means only hotter summers.”	MYTH	It also means freak rainfall, floods, cyclones, droughts, sea-level rise — extremes in every direction.
“Cows and paddy fields are a big methane source in India.”	FACT	Livestock + wet paddy fields are India’s main methane sources; methane is a much stronger warming gas than CO ₂ (short-lived).
“CO ₂ is the only greenhouse gas.”	MYTH	Also methane, nitrous oxide, water vapour, and F-gases.
“Mangroves store more carbon per hectare than rainforests.”	FACT	‘Blue carbon’ — the reason MISHTI conservation matters.
“Diamond is carbon’s only allotrope.”	MYTH	Graphite and fullerene too — same element, different structures.
“Air pollution is literally eating the Taj Mahal’s marble.”	FACT	Sulphur dioxide → acid rain → marble corrosion; particles cause discolouration (‘marble cancer’).
“Polar bears and penguins live together.”	MYTH	Polar bears = Arctic (North); penguins = mostly Antarctic (South).
“India’s forest cover is shrinking.”	MYTH	India’s forest + tree cover has been increasing (~25% of area); only a few countries can say this.
“Solar panels produce nothing on cloudy days.”	MYTH	Output drops but continues — modern panels work on diffuse light.
“Stubble burning affects only the farmers who burn it.”	MYTH	Smoke travels into cities — a big chunk of Delhi-NCR’s winter PM2.5, so it’s everyone’s problem.
“The Great Wall of China is visible from space to the naked eye.”	MYTH	Classic trick — astronauts confirm it is NOT; it’s too narrow.
“The Sundarbans is the world’s largest mangrove forest.”	FACT	It is — shared by India and Bangladesh, and also India’s natural World Heritage Site that doubles as a cyclone shield.
“India’s wild tigers and lions live together.”	MYTH	Lions: only Gir, Gujarat. Tigers: many reserves. They meet only in a zoo.
“Most of the Yamuna’s pollution in Delhi comes from untreated sewage.”	FACT	Sewage is the dominant source; industrial effluent and solid waste add on.
“Earth Hour means switching off for one hour will fix energy demand.”	MYTH	It’s a symbolic mass demonstration; the real value is awareness and policy pressure.

PART 4 · “AI × CLIMATE” SPECIAL ROUND — 10 QUESTIONS

The 2026 festival theme is AI & Climate Action — expect a themed round.

- 1. What does AI stand for? → Artificial Intelligence — machines doing tasks that need human-like intelligence (learning, prediction, language).
- 2. Give three ways AI helps fight climate change. → (i) **Better forecasts** of cyclones/heatwaves/floods; (ii) **optimising energy grids** & saving power; (iii) **tracking emissions, deforestation and wildlife** from satellite/camera data.
- 3. Which Indian mission uses AI + next-gen radars/supercomputers for weather? → **Mission Mausam** — ₹2,000 crore, Ministry of Earth Sciences, 2024–26, to make India “weather-ready and climate-smart” (IMD + IITM + NCMRWF).
- 4. How is AI used in wildlife protection? → Camera traps + AI to identify individual tigers; poaching alerts on sensor fences; predicting animal movement; counting herds from drones/satellites.
- 5. What is AI’s own environmental cost? → Data centres: huge electricity and water consumption (cooling). Big models = big carbon footprints — the “AI needs to go green too” debate.
- 6. What is a “digital twin” of Earth? → A computer simulation of the whole Earth (EU’s *Destination Earth*) used to test climate scenarios and plan adaptation — AI makes it possible.
- 7. AI in farming — examples? → Sowing advisories, pest/disease detection from leaf photos, precision irrigation; India’s IMD/Kisan e-Mitra style advisory services.
- 8. Why do early warnings matter so much? → A 24-hour warning of a cyclone/heatwave can cut deaths and losses dramatically; the UN’s goal is **Early Warnings for All** — AI is the accelerator.
- 9. What is AI-powered global weather modelling — and why is it news? → Models like GraphCast/neural forecasts can predict weather faster and often more accurately than traditional supercomputer models — IMD is testing AI/ML models on Indian data.
- 10. What is e-waste and why is it a climate issue? → Discarded electronics from the tech boom (chips, phones, servers); often dumped/toxic-recycled. India’s **E-Waste (Management) Rules 2022** push producer responsibility. “AI grows — e-waste grows.”

PART 5 · RAPID FIRE — 60 ONE-LINERS (the final drill)

Read the left column aloud, answer instantly, check right. Do it twice. This alone can carry your stage rounds.

Question	Answer
1. Blanket of gases trapping heat in the atmosphere	Greenhouse effect
2. Main greenhouse gas blamed for warming	Carbon dioxide (CO ₂)
3. Hottest year ever recorded	2024
4. 2025’s rank among warmest years	2nd or 3rd warmest
5. Current CO ₂ concentration	≈ 423.9 ppm (2024 record)
6. Year the Paris Agreement was adopted	2015
7. Paris temperature goal	Keep warming to 1.5°C (well under 2°C)
8. India’s net-zero year	2070
9. India’s 2030 non-fossil capacity target	500 GW
10. India crossed 50% non-fossil capacity in	June 2025 (5 years early)
11. India’s 2035 emissions-intensity target	–47% (vs 2005)
12. India’s 2035 non-fossil target	60% of installed capacity
13. UNFCCC was born at	Rio Earth Summit, 1992
14. Kyoto Protocol year	1997
15. IPCC was set up in (by WMO + UNEP)	1988
16. COP30 host city	Belém, Brazil (Nov 2025)
17. COP31 host	Antalya, Türkiye (9–20 Nov 2026)
18. Who leads COP31 negotiations?	Australia (Chris Bowen) — Türkiye holds presidency
19. Which country hosts COP32 (2027)?	Ethiopia — first LDC host
20. Ramsar Convention: year & place	1971, Ramsar (Iran)

21. India's Ramsar site count	≈ 100+ — most in Asia
22. India's first two Ramsar sites	Chilika (Odisha) & Keoladeo (Rajasthan), 1981
23. Indian sites on the Montreux Record	Keoladeo & Loktak
24. India's UNESCO World Heritage total	45 (37 cultural + 7 natural + 1 mixed)
25. India's newest UNESCO site (2026)	Ancient Buddhist Site, Sarnath
26. India's only mixed UNESCO site	Khangchendzonga National Park, Sikkim
27. India's first 4 UNESCO sites (1983)	Ajanta, Ellora, Agra Fort, Taj Mahal
28. Delhi's three UNESCO sites	Qutub Minar, Humayun's Tomb, Red Fort
29. World's largest mangrove forest	Sundarbans
30. India's tiger population (2022)	3,682 — world's largest
31. Project Tiger launched	1973
32. Lion census 2025	891 Asiatic lions (Gir)
33. Home of the one-horned rhino	Kaziranga, Assam
34. India's National Aquatic Animal	Ganges River Dolphin (2009)
35. Snow leopard population (2024 estimate)	≈ 718 (world's first national survey)
36. Rajasthan's state bird, critically endangered	Great Indian Bustard
37. Cheetahs were reintroduced at	Kuno NP, Madhya Pradesh (2022)
38. India's first biosphere reserve	Nilgiri (1986)
39. India's first national park	Jim Corbett, Uttarakhand (1936)
40. Chipko Movement (year & state)	1973, Uttarakhand
41. Khejarli sacrifice — year & community	1730, Bishnois (Amrita Devi)
42. Appiko movement	Karnataka, 1983
43. Silent Valley was saved in	Kerala
44. Narmada Bachao Andolan leader	Medha Patkar
45. Van Mahotsav started	1950
46. Bhopal gas tragedy / Pollution Control Day	Dec 1984 / 2 December
47. World Environment Day & 2026 host	5 June / Azerbaijan (theme: Inspired by Nature. For Climate. For Our Future.)
48. World Water Day	22 March
49. World Wetlands Day 2026 theme	'Wetlands and traditional knowledge' — heritage!
50. World Wildlife Day 2026 theme	'Medicinal & Aromatic Plants: Conserving Health, Heritage & Livelihoods'
51. Earth Day 2026 theme	'Our Power, Our Planet' (22 April)
52. Earth Hour	Last Saturday of March, 8:30 pm
53. National Energy Conservation Day (India)	14 December
54. International Day of Clean Energy	26 January
55. Global Tiger Day	29 July
56. Mission LiFE	Lifestyle for Environment (India, 2022)
57. ISA headquarters	Gurugram (India + France, 2015)
58. CDRI stands for	Coalition for Disaster Resilient Infrastructure
59. Mission Mausam	₹2,000-cr MoES weather/AI mission (2024–26)
60. Blue carbon ecosystems	Mangroves, seagrass, salt marshes
61. Net zero means	Emissions released = emissions removed (balance)
62. India's National Wildlife Week	2–8 October — it's THIS week!

PART 6 · 2026 DATES & THEMES + LAST NUMBERS

Day	Detail
World Wetlands Day — 2 Feb 2026	Theme: “ <i>Wetlands and traditional knowledge: Celebrating cultural heritage</i> ” — literally this quiz’s theme; drop it if you get a chance.
World Wildlife Day — 3 Mar 2026	Theme: “ <i>Medicinal and Aromatic Plants: Conserving Health, Heritage and Livelihoods</i> ” (CITES anniversary day).
World Water Day — 22 Mar	Water conservation; theme changes yearly.
Earth Day — 22 Apr 2026	Theme: “ <i>Our Power, Our Planet</i> ” (56th Earth Day; Earth Day began 1970).
World Environment Day — 5 Jun 2026	Host: Azerbaijan (Baku) ; theme: “ <i>Inspired by Nature. For Climate. For Our Future.</i> ”; begins with #NowForClimate.
National Wildlife Week — 2–8 Oct	This week! India observes it every year; the quiz is happening inside Wildlife Week.
World Ozone Day — 16 Sep	Marks the Montreal Protocol (1987).
Global Tiger Day — 29 Jul	Project Tiger’s day. (Tigers: 3,682.)
International Day of Clean Energy — 26 Jan	Renewables; India is ~52% non-fossil.
National Pollution Control Day (India) — 2 Dec	Marks the Bhopal Gas Tragedy, 1984.

PART 7 · CRISIS SCRIPTS — IF THE FORMAT IS NOT WHAT WE EXPECTED

-> “It’s a written elimination with 30 MCQs in 20 minutes!”

→ Scan all questions first (30 s). Answer certain ones immediately (aim 60%+). Keep track of time: 40 s/question max, then return. Never blank — educated guesses use elimination. Watch for “NOT correct” wording; tick it.

-> “They ask audio/visual with no text!”

→ Describe aloud: “That’s a mangrove — Sundarbans?” Quizmasters often confirm partially. In audio: bird-call = GIB/peacock; anthem-like = national symbols; thunder/monsoon clips = pawan/parvat themes — connect to the nearest bank item.

-> “Negative marking on buzzer!”

→ Buzz only when >70% sure. If both rival teams look blank, that’s when you own the question. Let others take –5s; then you answer and take +10s.

-> “Last question = doubling!”

→ Doubling is worth it only if you’re 80%+ sure or far behind (a gamble changes nothing when you’re 5th, everything when you’re 2nd and 3rd is close).

-> “Tie-breaker!”

→ Usually ordering lists: COP hosts (Glasgow → Sharm → Dubai → Baku → Belém → Antalya), first 4 UNESCO sites (Ajanta, Ellora, Agra Fort, Taj), or numbers ascending. Practise these three tonight.

-> “The quizmaster asks about the festival itself!”

→ Free marks: **6–7 Oct 2026 · Dr. Ambedkar International Center · “AI & Climate Action” · founder Neeraj Mehta · 2025 first edition at Bharat Mandapam · Champions ₹50,000.**

PART 8 · TOMORROW — LOGISTICS & CALM

CHECKLIST (paste in your phone notes now)

- **Venue:** Dr. Ambedkar International Centre, 15 Janpath, New Delhi. **Metro:** Udyog Bhawan (Yellow) or Central Secretariat (Yellow/Violet) — walk short distance. Reach by **8:15 AM**.
- **Carry:** school ID, registration/confirmation printout, a pen + small notepad, water bottle, light jacket. **Don’t** carry single-use plastic (it’s a climate festival).
- **Festival hours:** 9:00 AM – 7:30 PM (6 & 7 Oct). Quiz may be on either day — confirm slot from the guidelines/schedule.
- **Helpline:** 7070513613 · schools@purplefest.in (school office).
- **One-minute calm before your round:** 4 slow breaths, look at your teammates, say your one-line plan: “*Numbers me, map you, news third — huddle on my hand signal.*” Then smile — teams that look relaxed get more benefit of the doubt from quizmasters.

FINAL TEAM MANTRA

“We will not be blank on anything famous. We answer **one thing + one extra detail** every time. We buzz when sure. We never argue on stage. Even if we lose, we lose **with style** — and that is what the school remembers.”

Purple Umbrella FINALE BANK · built 5 October 2026 for the Climate & Heritage Quiz · facts verified against purplefest.in, WMO/UNFCCC, Union Cabinet NDC (Mar 2026), and official Indian sources as of today. Photos are for study identification only. Not an official question paper — no public paper exists.
